

You're Just a Click Away.

PSAB's Website Program

Having a presence on the web is critical. We've helped many of your neighboring municipalities with their websites. Through our Website Program, the Pennsylvania State Association of Boroughs (PSAB) can help your community, too.

We can assist you in developing a website that allows you to post items such as meeting notices and minutes, contact information, community events, and local ordinances. We can also create a blog, photo gallery, or online calendar. There are many options to consider to meet your needs.

You will also receive 4G of storage and unlimited email addresses. PSAB will also register and maintain your website's domain name, and we can transfer your current website to our server.

Can I Access My Email?

Your municipality will receive an unlimited number of email addresses that can be accessed online through any web connection. You can also use any email software like Outlook or Eudora.

How Can Updates to the Website Be Made?

Each website is developed in a WordPress content management system so your municipal staff will be able to update documents, text, or photos. Or, since you get seven (7) free hours of support each year, we can make the updates on your behalf.

What is the Cost?

With the program, you receive seven hours of development assistance, which is enough time to develop a website with up to 10 pages.

Each year you renew, you will also get seven (7) hours of support or development assistance. The initial website program is \$389 per year with a \$50 set up fee for new accounts. If you need additional assistance over the seven hours, you are eligible for a discounted rate. Annual renewal is required.

Additional Options Include:

- Logo design
- Graphic design services
- Online databases
